MANUFACTURE OF SOLVENTS, THINNERS AND CHEMICAL PRODUCTS FOR TRADE AND PRODUCTION

## SPRINTCHIMICA spa

We enjoy talking about our birth immediately after the war.

We feel like brave pioneers. We started off as **Sprint** and quickly established ourselves thanks to the burning desire to grow and rebuild that characterised many people at that time. We supplied small regional companies, which were also founded in that era, with thinners and other products. Our products were mainly of plant origin such as essence of turpentine and pine oil, imported from Asia, a continent that has inspired us and to which our logo is still linked even today.

With the growth of the market and research in the chemical industry, our product range has expanded and evolved, addressing mainly oil-based products. With the increase in demand the distribution area expanded continuously, affirming our position as the forerunner of an activity we were totally committed to and making us undisputed market leaders.

During the 1970s we moved, expanded, increased raw material storage and changed our name to **Sprintcolor**.

It is in our current premises that our final transformation to **SPRINTCHIMICA SpA** took place in 1985, still ahead of the times with the supplying of bulk solvents to dye factories, leather tanning industries, manufacturers of ink, mastic, adhesive tape and many others. Study, continuous research and curiosity opened up our knowledge and subsequently to the marketing of products related to the petrochemical industry but with different destinations and usages: products for professional construction, protective coatings for wood and iron and a wide range of chemical products in general, for the DIY and automotive sectors and destined both for professional applications (body shops, repair-shops) and traders in the sector. Today we operate extensively throughout the country with a network of our own representatives, paying particular attention to the quality and proper management of all products formulated by us or simply marketed by us, following guidelines of Responsible Care and Responsible Distribution programs and laws of quality certification ISO 9000.

All our products are packaged, transported and marketed in compliance with applicable laws, particularly with regard to the labelling of individual products in terms of safety, updated to reflect the latest EU directives, so to allow for proper handling by the end user. All packages have a special secure closure for child safety and braille indications of danger for the blind.

Each product is also available in barrels and in bulk as well as in containers customized by the client.

**NC ANTI-FOG THINNER NC EXTRA**

A nitro anti-fog thinner of very high quality, consistently formulated with the purest raw materials, without the addition of chlorinated substances. It has excellent anti-bleaching power and is particularly suitable in sectors where high quality nitro anti-fog thinners are needed.

To dilute paints: add the required amount of Nitro Thinner NC to the product until you get the desired viscosity, following the instructions on the packaging of the product to be diluted, in accordance with the Directive on limitation of emissions of Volatile Organic Compounds (VOCs) n.2004/42/EC. In accordance with the same directive, it may be used at the car body shops to wash utensils.

For cleaning brushes: wash thoroughly until all paint has been removed. The use of protective clothing and gloves is recommended.

**NC ANTI-FOG THINNER S/65**

It is a nitro anti-fog thinner particularly suitable for nitrocellulose coatings, both for iron and wood. Has good anti-bleaching power and can be used in above average humidity conditions. It makes paints shiny, allowing for good dilution while maintaining chemical characteristics.

### EURODIL THINNER

A UNIVERSAL thinner suitable for diluting mono-component paints, both quick-drying and synthetic types. It has excellent solvent and anti-fog power, with a very low odour. It makes nitrosynthetic and acrylic paints brighter, once dry. We wanted to be especially careful about making a product in the thinners segment which, due to its characteristics, complies with all the new EU rules on components used to provide the end user with a product classified exclusively as an Xi IRRITANT.

thinners

### THINNER FOR MASTICS

Universal thinner for normal, PVC, neoprene mastics and others. Great for cleaning brushes, spatulas and other utensils utilised for mastic.

### ANTI-SILICONE THINNER

It is a thinner specifically used to eliminate traces of silicone, wax, grease from iron structures or vehicle bodies, before painting.

### AC THINNER FOR ACRYLIC

Specific thinner for acrylic paints which does not alter the brightness and the mechanical strength of the enamel.

### EPOXY THINNER

Formulation of pure raw materials designed and tested for optimal dilution of varnishes and epoxides, results in maximum applicability and expansion, improving the final result.

### AC SLOW THINNER FOR ACRYLIC

07

**RETARDANT FOR NC AND PU THINNER**

The use of this retardant is recommended when, due to very specific atmospheric conditions such as excessive heat, high humidity, fog, a non-homogeneous and more opalescent coating is obtained. About 2-3% of this corrective substance must be added, although the percentages may vary depending on atmospheric conditions.

### ODOURLESS EXTRA SYNTHETIC THINNER

Its use as a solvent for synthetic and alkyd paint and enamel is recommended, specifically for application in closed and delicate environments, thanks to low odour and reduced harmful effects due to the absence of aromatics.

### TRE GEMME THINNER

A mineral white spirit with the addition of denaturing products in accordance with current tax laws. Ideal for thinning synthetic, alkyd and oil enamels and paints, synthetic primers, anti-corrosion products; improves application with brush or spray. Excellent for cleaning brushes and tools.

### ACQUARAGIA WHITE SPIRIT 150

Specific product for the dilution of synthetic and alkyd enamels and paints, oil paints, anticorrosion products and matt coatings; improves application by brush or spray, enhancing brilliance. Excellent for cleaning brushes.

### GEMMA SPRINT PURE THINNER

The essence of turpentine from pure pine bud, with superior quality and very pleasant smell; ideal for thinning fine art paint, solid wax for furniture and wooden and Tuscan tile floors, matt coatings, synthetic and alkyd enamel and grease.

### SYNTHETIC THINNER FOR BAKED COATINGS

Specific product specially formulated with pure raw materials for the dilution of synthetic enamels used in baked coatings.

### RAGIOLINA

Dearomatised white spirit It is recommended for use as a solvent for synthetic varnishes and paints for painting places such as hospitals, schools, restaurants, public buildings and all places where a strong odour should be avoided. Thanks to the absence of aromatic products, it exudes very little odour and has very low toxicity. It is also used in washing and degreasing floors, fabrics and surfaces in general.

### STRIPPER PAINT REMOVER

Stripper Paint Remover: Good value paint remover. Ideal for removing wall paint from indoor and outdoor surfaces, solvent or water based enamels, from wood and metal surfaces. It is a transparent gel that can be applied vertically. Non caustic.

**FREE FROM DICHLOROMETHANE**

### DECOSPRINT STRONG PAINT REMOVER

Strong and effective paint remover for quick removal of synthetic alkyd enamels, baked or air-dry coatings, wall hydropaint and nitrocellulose, polyester and polyurethane paints. It is applied with a brush and does not drip. It is not caustic and therefore does not damage wood and metal. Thanks to its new formulation, it is now more stable and has more paint removing power.

**FREE FROM DICHLOROMETHANE**

**PURE ACETONE**  
Solvent for numerous natural and synthetic resins, it is almost universally used in a myriad of application fields such as the cosmetics industry as a solvent for nail polish, in the industrial sector for the production of adhesives, dyes, paints and for selective extraction in the pharmaceutical, footwear and carpentry sectors. It is widely used for anything that requires high solvent power and rapid evaporation.

raw materials oils

**RAW LINSEED OIL**

Clear and shiny vegetable oil, sediment-free; it is raw linseed oil supplemented by specific products that make it ideal in the preparation of the foundation for Florentine tile flooring.

**PARAFFIN OIL B/50**

Duty-paid vaseline oil, colourless, odourless, tasteless. It is used as a lubricant for both domestic and industrial uses, even in the food processing industry. It is used in the cosmetic and pharmaceutical industries due to its extreme purity.

**PLASTOIL T.A. (WOOD OIL) STRAW YELLOW**

Denatured alkylated product, suitable for domestic and industrial applications, used as polish for wooden furniture. It is applied with a buffer, pure or diluted with Tre gemme white spirit. After applying polish with a soft cloth. Restores cleanliness and shine to wood. Water repellant

**RED PLASTOIL (WOOD OIL)**

Denatured alkylated product, suitable for domestic and industrial applications, used to polish and brighten the colour of wooden furniture. It is applied with a buffer, pure or diluted with Tre gemme white spirit. After applying polish with a soft cloth. Restores cleanliness, brilliance and hue to the wood colour. Water repellant.

WHALE OIL

Glossy synthetic finish. Apply with a buffer for the polishing of varnish on antique furniture, gives a smooth surface. Dilute with 3Gemme thinner or vm synthetic thinner. Can also be used on raw wood as a neutral protective agent.

EMULSIFIABLE OIL (RELEASE AGENT FOR CEMENT)

Emulsifiable oil with emulator additives which ensure extremely stable milky emulsions in water. It is suitable for cutting and processing steel, iron, cast iron with lathes and drills. It is also used as a release agent on reinforced concrete.

LEMON GRASS VEGETABLE OIL

Thanks to its special formulation, it creates an invisible barrier against mosquitoes allowing you to rest assured outdoors during warm summer evenings. Specially for garden and terrace torches.

GALLOIL

Produced with quick drying product, it has many uses because of its features: suitable for protecting and waterproofing wood fixtures and beams and can be painted with synthetic paints and enamel following treatment. It is also used for the preparation of anti-corrosion products, synthetic finishes, filler and mastic as well as printing ink and lithographs.

### EDILBLACK

Bituminous black paint dissolved in a solvent with a high tar content. It is used on cement, wood and iron as a protective coating. Due to its viscosity it is applied by brush or roller, without dilution, being a ready to use product. It can be used as antiqued patina of wooden structures such as antique furniture and ceiling beams; for this type of penetrating sealer, it is very important to dilute the product with our NC EXTRA NITRO THINNER.

The use of protective clothing and gloves is recommended.

### WAX STICKS

Coloured wax sticks of pure wax are used to repair and fill small scratches and dents in wood, to close holes caused by termites as well as for filling small cracks in the wood. The wax sticks are used by pressing the stick itself directly on the part to be repaired or filled. The wax sticks are available in 12 colours.

See colour chart

### CREO COLORS

The professional universal colourants “CreoColors” have no painting function, are compatible with most paint products such as hydro paint, quartz, synthetic enamels, nitro enamels, water-based enamels etc. ... and do not alter the technical characteristics of the products themselves. For special products such as polyester and elastic paint, it would be better to conduct compatibility tests. These dyes are highly concentrated for strong colouring power. Therefore, an application of 5/6% of the paste to the product to be coloured is sufficient for an intense shade: Can be blended. They are resistant to frost during storage.

### NITRO PRIMER WOOD FILLER

Transparent wood filler, nitrocellulose-based, fast-drying. Suitable for closing the pores of wood and for preparing surfaces for subsequent finishing operations. Once dry, sand the surface with fine sandpaper (220-240 grain) and dust well before applying further coats of finish. It is applied with a brush, paying attention to the drying time elapsing between the application of the two coats. It also applied by diluted spray like our NC EXTRA NITRO ANTI-FOG THINNER until the desired viscosity is obtained, in compliance with the Directive on the limitation of emissions of Volatile Organic Compounds (VOCs) n.2004/42/EC. The use of protective clothing and gloves is recommended.

**MAGIK CATENE  
GREASE SPRAY**

Ideal for protecting and lubricating all moving and still mechanical parts.  
The special composition of the preparation allows it to penetrate where other products normally do not penetrate.  
Its high viscosity makes it particularly effective for fast moving mechanical parts without being ejected by the centrifugal force. Does not crack and protects all metals from atmospheric corrosion.

Package	Capacity	Pieces	Price
Spray can	0,4 Litre	12	

**F+** R12 • R52/53

### NC ANTI-FOG THINNER

It is a nitro anti-fog thinner particularly suitable for nitrocellulose coatings, both for iron and wood. Has good anti-bleaching power and can be used in conditions of humidity above the norm.

It makes the paint glossy, allowing for good dilution and maintaining their chemical characteristics.

### SUPER NC ANTI-FOG THINNER

It is a nitro anti-fog thinner of very high quality, consistently formulated with the purest raw materials, without the addition of chlorinated substances. It has excellent anti-bleaching power and is particularly suitable in sectors where high quality nitro anti-fog thinners are needed.

### PU POLYURETHANE THINNER

Thinner formulated with the purest raw materials which are balanced in order to obtain a product suitable for the dilution of one-component and two-component polyurethane paints. It is particularly used in painting furniture and precious objects.

DEAROMATISED ODOURLESS WHITE SPIRIT

Dearomatised white spirit It is recommended for use as a solvent for synthetic varnishes and paints for painting places such as hospitals, schools, restaurants, public buildings and all places where a strong odour should be avoided. Thanks to the absence of aromatic products, it exudes very little odour and has very low toxicity. It is also used in washing and degreasing floors, fabrics and surfaces in general.

REGULATION (EC) No 1272/2008 - PRECAUTIONARY “P”

General safety advice

P101	If medical advice is needed, have product container or label at hand.
P102	Keep out of reach of children.

Precautionary statements - Prevention

P210	Keep away from heat / sparks / open flames / hot surfaces - No smoking.
P260	Do not breathe dust / fumes / gas / mist / vapours / spray.
P262	Avoid contact with eyes, skin or on clothing.
P264	Wash thoroughly after use.
P271	Use only outdoors or in a well-ventilated area.
P280	Wear protective gloves / protective clothing / eye protection / face protection.

Precautionary statements - Reaction

P310	Immediately call a POISON CENTRE or doctor.
P312	If you feel unwell, contact a POISON CENTRE or doctor.
P313	Consult a doctor.
P320	Specific treatment is urgent (see on this label).
P331	Do NOT induce vomiting.
P332	If skin irritation occurs:
P301+P310	If swallowed, immediately contact a POISON CENTRE or doctor.
P301 + P312	In case of ingestion, call a poison control centre or physician if you feel unwell.
P302+P352	In case of contact with skin: Wash with plenty of soap and water.
P304+P340	In case of inhalation: Remove victim to fresh air and keep at rest in a position that permits comfortable breathing.
P305+P351+P338	In case of contact with eyes: Rinse carefully with water for several minutes. Remove any contact lenses if easy to do. Continue rinsing.
P337+P313	If eye irritation persists, consult a doctor.
P370+P378	In case of fire: Use foam, dry powder or carbon dioxide (CO2).
P390	Absorb spillage to prevent material damage.

Precautionary statements - Conservation

P405	Store locked up.
P403+P233	Keep container tightly closed and in a well ventilated area.

Precautionary statements - Disposal

P501	Dispose of contents / container according local laws.
